PROFESSIONAL SUMMARY

Data Engineering enthusiast with hands-on experience building ETL pipelines, BI dashboards, and ML solutions using Python, SQL, Power BI, and Tableau. Strong foundation in data modeling, preprocessing, and statistical analysis. Actively upskilling in cloud platforms (AWS, GCP/BigQuery) and big data tools. Solved 350+ LeetCode problems (100-day streak) with 40+ GitHub repositories.

TECHNICAL SKILLS

Languages:	Python (Advanced), SQL, C++, Java
Data & ETL:	Pandas, NumPy, Data Preprocessing, Feature Engineering, Pipeline Design
Databases:	MySQL, PostgreSQL, MongoDB
BI & Viz:	Power BI (DAX, Power Query), Tableau, Excel (Advanced)
ML & CV:	Scikit-Learn, TensorFlow, Random Forest, CNN, OpenCV, MediaPipe, YOLO
Cloud (Learning):	AWS (S3, EC2), GCP / BigQuery, Apache Spark
Tools:	Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Docker

TECHNICAL PROJECTS

COVID-19 India Data Pipeline & Dashboard Python, Tableau	2025
- Built an ETL pipeline using Python & Pandas to ingest and clean large-scale COVID-19 datasets (56B+ vaccination records, 23.7L+ deaths) across 30+ states. - Designed an interactive Tableau dashboard for state-wise trend analysis, reducing stakeholder time-to-insight by ~40%.	
Retail Sales Analytics Dashboard Power BI, SQL, DAX	2024
- Analyzed \$1.20M in sales across 8,523 grocery SKUs using SQL & Power Query; built a DAX-driven Power BI dashboard for outlet-level and product-level drill-down analysis. - Surfaced Low Fat (\$425K) vs Regular (\$776K) segmentation insights, cutting manual reporting effort by ~35% via automated data refresh.	
Heart Disease Risk Prediction System Python, Scikit-Learn, Streamlit	2024
- Engineered an end-to-end ML pipeline — EDA, feature selection, normalization, and Random Forest training — achieving ~85% accuracy on clinical datasets. - Deployed real-time prediction via Streamlit, enabling web-based CHD risk assessment and reducing manual analysis effort by ~30%.	
Real-Time Traffic Monitoring System Python, YOLO, OpenCV	2024
Built a real-time vehicle detection & counting pipeline using YOLO + OpenCV on live video feeds, with time-series aggregation for traffic pattern analysis.	
Student Academic Data Management System Python, MySQL	2024
Designed a normalized MySQL schema for student records and grades; built Python CRUD operations and SQL analytics queries for GPA and performance reporting.	
Weather Forecast App Python, REST API, JavaScript, Leaflet.js	2024
Consumed OpenWeather REST API to fetch real-time weather data (temperature, humidity, wind speed) for any city and rendered an interactive map with Leaflet.js.	

EDUCATION

B.Tech — Computer Science Engineering (Data Analytics)	2023–2027 CGPA: 9.0 (Ongoing)
SAGE University Bhopal	
Class XII — Science	2022 82.8%
Inter Science College Hazaribag	

CERTIFICATIONS

Machine Learning — Stanford University	Feb 2026
Google Data Analytics — Google	Nov 2025
Software Development — Microsoft	Mar 2025
Mastering Tableau — Sunstone	Nov 2024
Data Structures & Algorithms — Sunstone	Aug 2024

ACHIEVEMENTS & COMPETITIVE CODING

- Solved 350+ LeetCode problems (186 Easy / 139 Medium / 25 Hard) with 100-day max streak and 264 active coding days.
- Maintained 40+ GitHub repositories with 312+ commits across ML, data analytics, and computer vision projects.
- 1st Place — Code Quest Competitive Programming Challenge at SAGE University Bhopal.
- Academic Excellence Award — SAGE University Bhopal, outstanding 1st-semester performance.
- Conducted Power BI peer-learning session for 150+ B.Tech, BBA, and MBA students.
